

Replacement BARRELS and SCREWS

Keep Your Processing Performance At Its Peak

Our high-performance designs can enable you to cut cycle time with faster screw recovery and lower melt temperature, improve color consistency and part quality, too. We also offer general-purpose screws in OEM designs and rebuild/repair services.

Barrels and Screws for Any Make or Model

- High performance screw designs for improved mixing, higher recovery rates and lower melt temperatures
 - Application-specific screw designs for low shear and uniform melting, eliminating hot spots and splay
 - High Wear Resistant and Corrosion Resistant barrels and screws
 - Screw tip materials and designs optimized for your application

Barrel and Screw Rebuilding

- Complete barrel and screw rebuilding services with quick turn-around
- Cost effective barrel and screw maintenance programs are available

Barrels, screws and screw tips available for *Any Make or Model*
